

What's New in iPhoto '11

- * **Full Screen View:** Enter this mode and everything else disappears, including the Menu Bar.
- * **eMailing Photos:** Now all can be done within iPhoto. Eight templates available offering message space right within the message & photo. Keeps track of emailed photos for ease of editing or resending.
- * **Online Sharing:** Easily upload photos to your Facebook album or Flickr. Update your Facebook photos from within iPhoto as well as view the comments your buddies have made about your Vacation (or whatever) photos (You'll see them in the Info panel)
- * **New Slideshow Themes:** Six new themes, Holiday Mobile, Reflections, Vintage Prints, Places and Origami. Themes recognize faces, centering each face it finds. New themes also come with their own soundtracks, and the export option is now optimized for iPad.
- * **View and trim videos:** You can now watch videos captured with your video cameras right in iPhoto. You can also trim footage from the beginning and the end of your clips, and then share them to your Facebook wall or iCloud gallery.
- * **Photo Stream:** Store and share photos in iCloud
